# VBP Courses

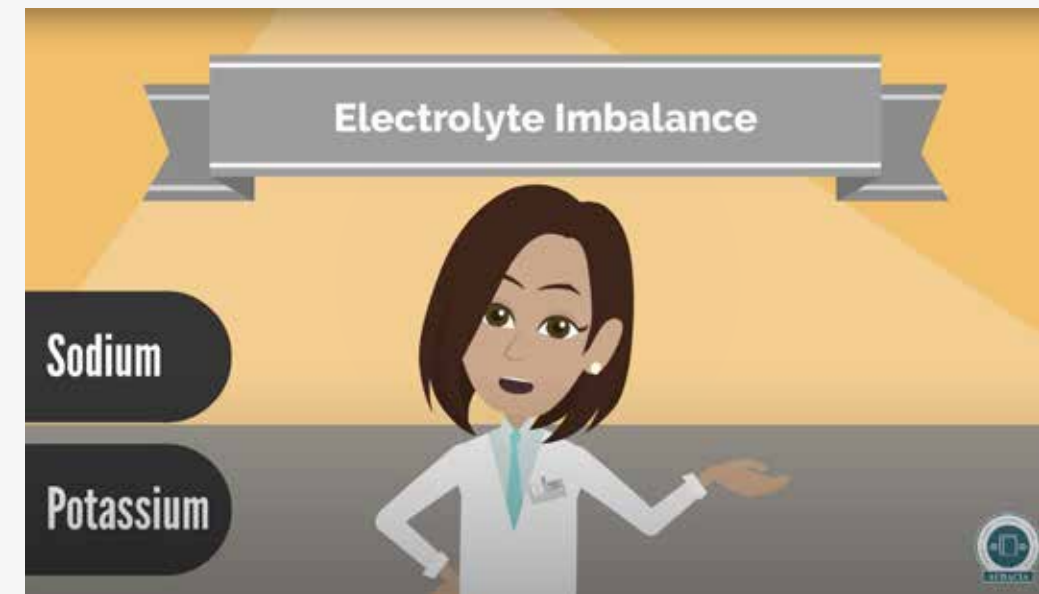

## Anemia

Anemia is a common condition and can affect many home care clients. Anemia is often not recognized or treated, and there can be serious results. If anemia can be prevented and treated, then these serious results may also be prevented.

**Duration:** 45 minutes  
**Languages:** English, Spanish, Russian

## Electrolyte Imbalance

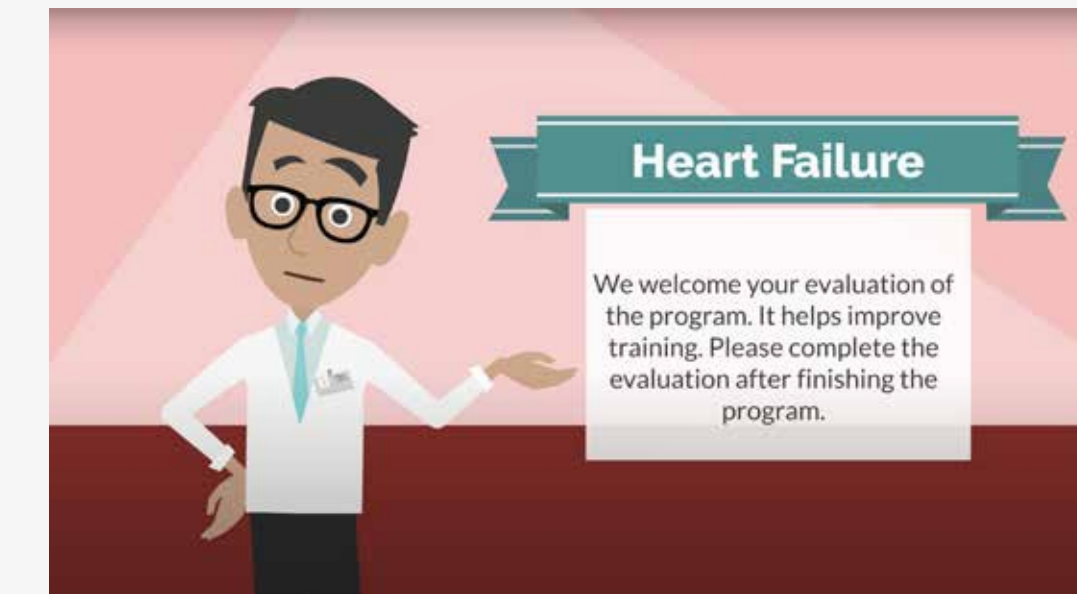

Home health aides have an important role and contribution to make in helping clients with maintaining fluid and electrolyte balance and avoid becoming hospitalized for preventable imbalances.

- This course has two parts:
- Part 1 - Understanding Electrolyte Balance and Imbalances
  - Part 2 - Electrolyte Imbalance - Sodium and Potassium

**Duration:** 1 hour  
**Languages:** English, Spanish, Russian

## Heart Failure

Heart Failure is considered to be a serious disease which can become worse and can even lead to death when left untreated or when symptoms are ignored and not reported. Aides have a very important role in helping clients living with heart disease remain at home and avoid potential hospitalization.

- This course has two parts:
- Part 1 – Know, Observe, Report, Prevent
  - Part 2 – Food Choices & Menu Planning

**Duration:** 1 hour  
**Languages:** English, Spanish, Russian

# VBP Courses

## Respiratory Infections

Respiratory infections affect many people, and as members of the health care team, home health aides play very important roles. The knowledge you have and your skills in caring for your clients, such as observing, reporting, and taking precautions are very important to the quality of care and quality of life they experience.

This course has two parts:

- Part 1 – Learn About Respiratory Infections
- Part 2 – Flu & Pneumonia

**Duration:** 1 hour

**Languages:** English, Spanish, Russian

## Sepsis

Sepsis is a serious and life-threatening condition. It is a medical emergency that can lead to death and can happen to anyone. That is why it is so important to know more about it.

The good news is that if more people know about sepsis, then people can get the immediate medical treatment that is necessary to help prevent them from dying or to prevent suffering from possible lifelong permanent damage. You will learn about the important role you can play in saving lives!

**Duration:** 45 minutes

**Languages:** English, Spanish, Russian

## Urinary Tract Infections

Urinary tract infections are among the most common infections in older adults. Your care helps clients to be as independent as possible and live with dignity. Clients, families, and home care agencies recognize how important your role is in helping clients stay in their own home and possibly avoid going to the hospital.

This course has two parts:

- Part 1 - Learn About UTIs
- Part 2 - Observe, Report & Prevention of UTIs

**Duration:** 1 hour

**Languages:** English, Spanish, Russian

# VBP Courses

## Urinary Incontinence

Recognizing, reporting, and supporting our home care clients who experience urinary incontinence is very important. Without effective continence management, it could lead to infection, falls, skin breakdown, inactivity, and the general decline in a person's health.

This training has two parts:

- Part 1 - What is Urinary Incontinence?
- Part 2 - Effects of Urinary Incontinence

**Duration:** 53 minutes

**Languages:** English

## Bowel Incontinence

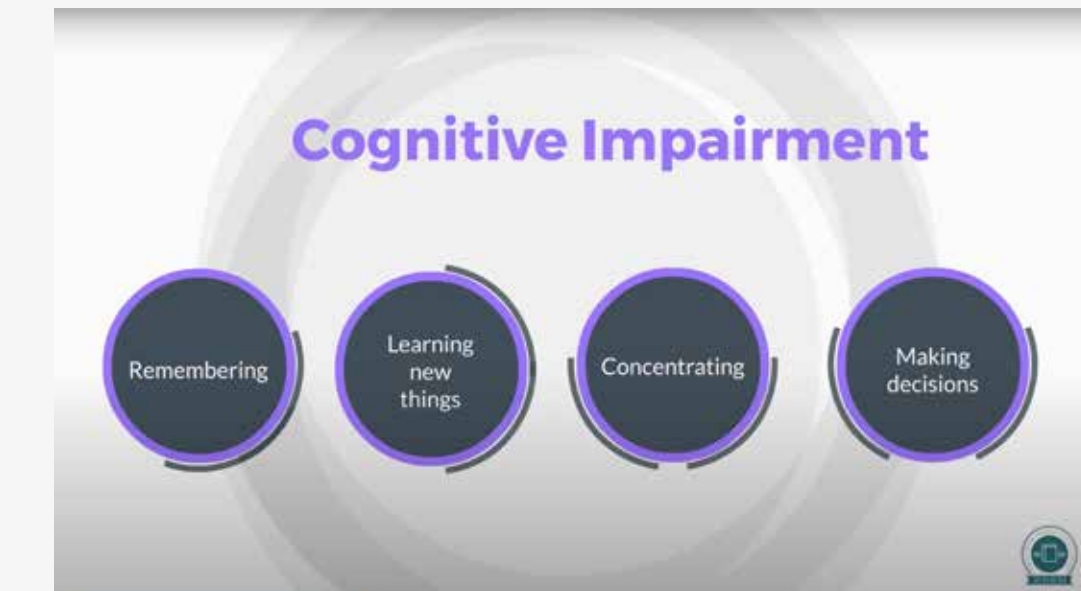

Bowel incontinence is a condition that can affect any gender and age group. As a caregiver, you can play an important role in supporting your client that is experiencing bowel incontinence by respecting their feelings, showing empathy, providing them with the necessary privacy during care and being kind and compassionate towards them.

**Duration:** 45 minutes

**Languages:** English

## Dementia

This program introduces information about Dementia that can help better prepare home health aides to care for clients with this condition. By learning and applying the information we learn in this program, following the plan of care and guidance from the nurse, aides can make a big difference in the lives of their clients every day.

This program has two parts:

- Part 1: Common Types and Signs of Dementia
- Part 2: Brain Changes in Dementia

**Duration:** 45 minutes

**Languages:** English
